Dave,

I got a call from Craig Sautner this morning directly about this issue. Rich Rupert call Mr. Sautner and is setting a time to drop by and check this out.

Rich

Subject: water testing..

Sautners water turned very bad again yesterday-after EPA tested there. Hopefully EPA will revisit their water well needs testing from EPA-another example of Cabot's inferior drilling. We are very glad to have EPA here testing..it will be hard for Cabot to call it naturally occurring when they return to drill more wells here and frack. We know they will be back since this is a very profitable gas field for Cabot. We are shocked at Cabot's assault on EPA and the president. I don't think either is calling for a shut down just for it to be done safely..apparently they know it cannot be done without impact to our drinking water..hence the Haliburton loonhole..Our DEP has allowed CABot to operate unsafely. Hopefully EPA will be able to rectify that. Sincerely,
